Θ Ε Μ Α Τ Α

For the first few minutes after jumping out of the plane I just fell. I had my oxygen mask and helmet, but it was very cold and I was falling very fast.

My left hand was completely numb. I couldn't open the parachute because I was too high and there was not enough air. At last there was more air and I began to go more slowly and suddenly the parachute opened. My nose was bleeding, my right hand was cut, and my left hand was still very cold, but I felt better.

Then I noticed that the clouds were getting dark and I realized I was going into a thunderstorm. All of a sudden there was wind, rain, thunder, lightning and even hail. As I was falling, I closed my eyes to protect them from the lightning.
